## **Namastay Training Puppy Classes**

- Are taught primarily off leash. This allows dogs to interact with other dogs to develop appropriate dog-to-dog behaviors, including excellent bite inhibition.
- Are family style-meaning the whole family can attend.
- Provides lots of gentle handling by friendly strangers. This allows the puppy to learn to be people friendly dogs.
- Teaches the basic obedience cues-sit, down, come, impulse control, and attention as well as household manners

**Behavior problems are the primary reason why people  
surrender dogs to shelters.**

**My puppy class will insure that your puppy won't be  
one of them.**

## **Testimonials**

"Namastay puppy classes are excellent for three reasons: We humans learn critical skills for leading and living with our pups (soon to be full-grown dogs!), our puppies learn equally important skills about how to be dogs, appropriately, in our human world, and all of this good, loving and supportive learning is done in a relaxed and FUN environment. The kids, the puppy and I really looked forward to our weekly classes.

I cannot thank Jennifer enough for teaching my entire family and our puppy the basics of puppy training. We look forward to taking many more dog classes with Jennifer and Namastay Training. It's been time and money well spent."

-Jennifer F from Arvada, CO

"Jennifer's classes are fun and use a completely different approach and emphasis than any other classes I have been to. The others were geared toward imposing certain commands on the dogs so they did what you tell them. These classes have much more emphasis on socialization and watching and listening to your pet so that training becomes an interactional process, not a one way "you do what I say" exercise."

~Rebecca W in Denver

**Don't go to a big box location when you can get the best puppy  
class in town for only \$25 a week!**
